

# Managers: Want to protect your equipment and the environment?

It's easy with the right  
wicket gate grease.

## This is VSG: 'The Green Grease'

*Just let us know what you are using now  
and we will do a comparison and cost justification.*

**Start using a better product now!**

### Benefits of VSG:

- *More biodegradable • Mainly canola, which is renewable • Low toxicity*
- *Excellent corrosion protection • Inherent anti-wear characteristics*
- *Water resistant • Good mobility in greasing systems • Non-soap thickener for less plugging • No chlorinated compounds or heavy metals*
- *And you can possibly use much less!*

### Cons of some current greases:

- *More bearing wear • Corrosion • Water washout • Grease line plugging*
- *Higher gate opening forces • Failed wicket gates • Grease distributor plugging*
- *More expensive over time • A black mark for putting mineral oil and heavy metals from the grease thickener and additives into the waterways.*
