

'Providing Tribological Solutions'

NEWS RELEASE

IMPROVED AVAILABILITY OF MOV LONG LIFE

FluidCenter has established Forsythe Lubrication Associates as our exclusive agent for MOV Long Life. Technical questions will still be handled as before.

Forsythe brings over ninety years of lubrication experience, a North American presence, custom blending, stocking facilities and a lubricant test laboratory. The Forsythe site is in Hamilton, Ontario which is north of Buffalo and just west of Toronto. Forsythe is also listed with the supply groups at many utilities because they are the North American agents for the Great Lakes Chemical line of Reolube Turbofluid phosphate ester based lube and control fluids. These are approved by GE, Siemens, Westinghouse, ABB, NEIP and others.

Forsythe and FluidCenter will also be working to establish a greater presence for other specialty and/or problem solving products. This could include a premium bearing grease, a premium gear coupling grease, a misting oil, rust preventatives and a biodegradable grease for hydroelectric power plants and/or CCW and SW systems.

Forsythe contact information is as follows;

Forsythe Lubrication Associates
120 Chatham Street
